DETAILED ACTION

Allowable Subject Matter

1. Claims 1-6 allowed.
2. The following is an examiner's statement of reasons for allowance: Prior art fails to show prior art fails to show a rotating shaft penetrating through a weighted disc vertically, therein the bottom of the rotating shaft settled over the stop-push bearing seat on the thin plate of the stator; which characteristic is on the bottom the structure of the shell settling a vibrating thin sheet which could makes the shaft of the rotor to rotate freely on supporting the weighting disc and to drive the thin plate stator to vibrate freely under the frequency of the ultrasonic by means of the input of the A.C. signal and the output of the vibration energy. The method of actuating is inherent base on the structural limitations of the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
